

Kut Kwick Corporation Announces the Addition of New Slope Mower to Product Line

The New 2019 Tier 4 Super Slope Master SSM-T4 is being added to Kut Kwick's Line of Slope Mowers & Brush Cutting Equipment

Brunswick, GA, April 12, 2019 (Newswire.com) - Kut Kwick Corporation is a factory-direct equipment manufacturer that builds industrial, heavy-duty slope mowing and brush cutting machinery. Early in 2019, they introduced a major change to the product line by integrating a new series of Tier 4 Final engines into their equipment.

One of the added benefits to the new Kut Kwick Tier 4 machines is the digital information flat screen that provides the operator with all the pertinent engine information. This feature is part of an engine management system that monitors operating parameters and allows the maintenance team to set service interval reminders. As always, Kut Kwick machines have a certified Rollover Protection System (ROPS) for safety and are all true zero-turn-radius (ZTR) machines for maximized productivity.

For additional information on Kut Kwick slope mowing and brush cutting equipment, call 912-265-1630 or visit their website at kutkwick.com.
